This is one of the most fun VR Games I have played for the HTC VIVE. The way that the developers make dodgeball fun and entertaining to play continuously is awesome! I love their new updates like how the ball turns to glass after being on the ground for a while and also the new added game modes like Last Life, Insane mode, time mode and the other ones they added. And this game only costs \$2 so you should buy it! Definitely recommended! Very little bugs but the improvements do not affect game play.
